Board of Health Update

The Board of Health applied for a “Practice Safe Skin Program” grant through the Melanoma Foundation of New England. We have been awarded two sunscreen dispensers, two cases of sunscreen and two poles to hold the dispensers.

We will be putting a dispenser at the HRA property, where the surf camps and a large amount beach visitors park. The other dispenser will be located at L St where the Recreation camp takes place.

The Board of Health would like to see Hull become a HeartSafe Community. We are in the beginning stages of gathering information. Heartsafe is a public health initiative intended to help more people survive after sudden out of hospital cardiac arrest.
