

No Wipes in the Pipes

Vactor Truck needed to clean sewer and manhole

Wipes deposited in manhole created sewer blockage

With the increased use of wipes as a result of the Corona virus outbreak, we ask everyone to be aware that wipes, paper towels, facial tissue, floss, hair and grease can meld together in the sewer and create what we call FAT BERGS. Any one or combination of these materials can create a blockage in your sewer or the Town sewer, resulting in additional costs, emergency response, and at this time, place workers at risk in clearing blockages.

Throw wipes in the trash, not the toilet.

Remember the three Ps
